

PRODUCT INFORMATION - CARMIX (2820)

Carmix is a concentrate of vitamins and minerals, which has been used for years for carnivorous mammals and birds by many European animal parks. The feed has also proved itself with reptiles, mainly with tortoises and snakes, especially during their growing season. Adding 2% of Carmix to animals' daily ration, provides carnivores with the right quantity of vitamins and minerals in sufficient proportions. It was proved that adding Carmix to bird feed prevents the weakening of bones. Carmix also contains a quantity of well digestible carbohydrates and is well accepted as regards the other preparations.
