

251320 PRIMATE DIET PT 1

COMPLEMENTARY FEED FOR PRIMATES

An apple flavoured grower and maintenance food for Old World Primates. As a result of the lower protein content, the food can not be used as a complete feed for New World Primates.

Feed supplement for monkeys. A pellet to enhance maintenance and growth. The pellet has a high fibre content (hemicellulose, cellulose and lignin). The means Primate diet PT aids proper digestion. Not suitable as a feeder for New World Apes.

- High amount of fibre
- Contains soluble and thus easily digestible grains
- With apple aroma

Recommended daily feed intake:

Give the primates at least half of their daily rations in the form of the pellets, as they eat approx.. 2-4% of their body weight a day and the amount of food is then squeezed out based on dry matter.

Composition:

By-products of cereals, Products of other plants, Products of oil seeds and oleaginous fruits, Products of seeds and fruits, Products of tubers and roots, Minerals, Fermentation (by-)products from microorganisms, Oils and fats.
