## CARNIZOO

### COMPLEMENTARY FEED FOR CARNIVORE BIRDS OF PREY AND REPTILES

Carnizoo is a vitamin and mineral concentrate for birds of prey and meat-eating reptiles. The nutritional composition of Carnizoo is based on a dosage of 1% in the diet. Mix Carnizoo through the daily diet. In this way, the animal gets the right amount of minerals, trace elements and vitamins it needs for its everyday activities and good health.

Carnizoo contains omega-3-fatty acids derived from fish oil. Chalk weed is an important source of the minerals calcium and magnesium. This type of mineral makes it very easy to absorb calcium and contributes towards an uninterrupted digestion of the diet and to bone mineralization. It ensures bones remain light but strong with many cross connections in their internal structure.

- Contains a balanced level of vitamins and minerals for good health
- Ensures the development of strong and light bones
- Contains omega 3-fatty acids EPA and DHA to support the immune system and the ability to be learned and trained
- Contains taurine and L-Carnitine
