

AKWAVIT Fish eating animals

Product code: 690206

Feed supplement for fish-eating animals. Akwavit Fish-eating Animals is a daily supplement specially developed for various fish-eating animals such as penguins, ibises, and pelicans. Akwavit Fish-eating Animals contains all the necessary vitamins and minerals in the proper proportions. Akwavit fish-eating Animals contains a limited amount of vitamin A and in addition beta-carotene as pro-vitamin A. Betacarotene is converted into Vitamin A as the animal requires.

High levels of thiamine help prevent thiamine deficiency. This is particularly important when feeding the animals dead fish, as decomposition enzymes are present that specifically target thiamine. Thiamine must be provided in the feed every day, as it compensates for any lack of the vitamin and so prevents any attack on the central nervous system. The tablets have a dividing line, making it easy to provide a half dose.

Complementary feed especially developed for various fish eating animals such as penguins, ibises and pelicans.

Directions for use:

Feed the animals by placing the tablet into the feed fish.

Body weight	0 – 40 kg:	½ tablet per day
Body weight	40 – 75 kg:	1 tablet per day
Body weight	75 – 150 kg:	2 tablets per day
